## OBJECTIVE

---

Highly motivated and technically proficient B.Tech CSE student seeking software internship to apply academic knowledge, practical skills, and problem-solving abilities. I am eager to learn new technologies, adapt, and grow within a dynamic and collaborative work environment and contribute to innovative projects that drive organizational growth and success

## EDUCATION

---

|                                                                   |                    |
|-------------------------------------------------------------------|--------------------|
| <b>Bachelor of Technology in COMPUTER SCIENCE AND ENGINEERING</b> | <b>2023 – 2027</b> |
| International School of Technology and Science's For Women        |                    |
| <b>Higher Secondary Education (Class XII)</b>                     | <b>2021 – 2023</b> |
| Vignana Jyothi Junior College                                     |                    |
| <b>Secondary Education (Class X)</b>                              | <b>2020 – 2021</b> |
| Z PP High School                                                  |                    |

## SKILLS

---

|                          |                                                                   |
|--------------------------|-------------------------------------------------------------------|
| <b>Programming Skill</b> | Python , C , Java                                                 |
| <b>Software Tools</b>    | Jupyter Notebook, Google Collab, VS Code , Eclipse , Code::Blocks |
| <b>Soft Skill</b>        | Team work, Effective Communication, Leadership                    |

## FINAL PROJECT

---

### Smart Pothole Detection System

#### Python | OpenCV | Machine Learning

- Developed a machine learning-based pothole detection system using computer vision techniques.
- Performed image preprocessing and feature extraction using OpenCV to improve detection accuracy.
- Implemented image classification to identify potholes from road images.
- Designed the solution to support road safety through automated pothole detection.

## CERTIFICATION

---

|                                                 |             |
|-------------------------------------------------|-------------|
| 1. NPTEL – Ethical Hacking                      | <b>2025</b> |
| 2. Future Interns – Machine Learning Internship | <b>2026</b> |
| 3. Service Now Virtual Internship               | <b>2026</b> |

## ACHIEVEMENTS

---

- Maintained an active GitHub portfolio showcasing academic and personal projects.
- Continuously improve programming and problem-solving skills through hands-on project development.
